Preface

These proceedings contain the presentations of the Education Programme of the EUROGRAPHICS 2007 annual conference, held in Prague, Czech Republic, between the 3rd and 7th of September 2007. This is the fifth occurrence of this Programme, which was started at the 2003 conference in Granada (Spain), and continued at the conferences held in Grenoble, France (2004), Dublin, Ireland (2005) and Vienna, Austria (2006).

The overall objective of the Programme is to provide a forum for dissemination and discussion of works of educators who teach courses in computer graphics or use computer graphics to teach another topic. This work is of obvious interest and benefit to all of us involved in computer graphics. Effective graphics courses ensure that graduates entering research programmes or industry are well equipped to handle the demands that will be placed on them.

This year’s programme received many excellent submissions. Each paper was reviewed by at least three members of the Programme Committee. We have selected six superb papers for presentation. Unfortunately, due to limited session time, we have had to reject some very interesting and high-quality papers.

The programme is divided into three sessions and includes papers on teaching computer graphics, on using graphics in education, and a panel discussion of the Computer Graphics Education 2006 Workshop Report. It is noteworthy that this is the first time that the Education Programme includes a panel session. We think that it will be of great interest that the attendants have a chance to exchange views about the impact of the Workshop and the Bologna recommendations on computer graphics curricula.

Finally, we would like to thank all the authors who submitted papers and the International Programme Committee for their contributions to this conference. We also thank the EUROGRAPHICS’07 organisers and the EUROGRAPHICS Association for their very valuable support.

We hope that you will enjoy and find useful this year’s Education Programme.

Isabel Navazo and Petr Felkel

Program Committee for Education Papers
Table of Contents

Sessions

- Teaching Computer Graphics
- Teaching with Computer Graphics
- Panel Discussion

ED1 - Teaching Computer Graphics

Computational Geometry Education for Computer Graphics Students
Ivana Kolingerová (University of West Bohemia) 1

Creating Interest in Computer Graphics by Teaching Game Development
Ashish Amresh, Pushpak Karnick (Arizona State University) 9

An E-Learning Course on Scientific Visualization
Christiane Taras, Martin Rotard, Thomas Ertl (Universität Stuttgart) 17

ED2 - Teaching with Computer Graphics

ProbonoWorld:
Educating the Mentally Handicapped in a Virtual Environment using Props on a Board
Saskia Groenewegen, Stefanie Heinz, Anke Huckauf, Bernd Fröhlich (Bauhaus-Universität Weimar) 23

Teaching Algorithms and Data Structures through Graphics
Andrew T. Duchowski, Timothy A. Davis (Clemson University) 33

Extended Game Platform for Novice Programmers
Yolanda Rankin1, Thomas Lechner1, Bruce Gooch2
(1Northwestern University, 2University of Victoria) 41

ED3 - Panel Discussion

A Discussion of the CGE06 Workshop Report:
A Computer Graphics Curriculum that Addresses the Bologna Requirements
Moderator: Steve Cunningham (Brown Cunningham Associates)
Anticipated panelists: Jean-Jacques Bourdin1, Cecilia Sik Lanyi2, Marta Fairén3, Werner Hansmann4
(1University of Paris, 2University of Pannonia, 3University of Catalunya, 4University of Hamburg) 49

Report of the CGE 06 Computer Graphics Education Workshop
Vienna, Austria, September 9, 2006
Jean-Jacques Bourdin, Steve Cunningham, Marta Fairén, Werner Hansmann 51
