Preface

This year, 37 papers were submitted to the short papers programme of the Eurographics 2021 Conference, taking place May 3-7, 2021, in a purely virtual format, organized by TU Wien. The review process started with assignment of a primary and a secondary reviewer from the 31 members of the International Programme Committee to each paper. Each of those then selected one additional external tertiary reviewer, making for a total of 4 reviews per paper. The reviewing process was double blind (for terriaries), and produced 143 reviews in total. After reviewing, all reviewers of a paper discussed the paper on the SRM discussion board, and the primary made a recommendation for paper acceptance or rejection. 16 papers were conditionally accepted, and after a revision phase also finally accepted, corresponding to an acceptance rate of 43.2%. The accepted papers were presented in 3 sessions, titled “Modeling and Rendering”, “Imaging and Video”, and “Animation and Visualization”.

We would like to extend our sincere thanks to all of the reviewers from the International Programme Committee, and the external reviewers for their excellent and timely reviews. We would also like to thank Stefanie Behnke for her help with the SRM system, as well as René Berndt for last-minute adjustments to the system. And last but certainly not least, we want to thank all the authors who submitted their excellent work to the short papers programme of the Eurographics 2021 Conference!

Vienna, May 2021

Short Papers Program Co-Chairs
Holger Theisels and Michael Wimmer
Committee Members

Francesco Banterle, Visual Computing Laboratory, ISTI-CNR, Italy
Tom Bashford-Rogers, University of the West of England, England
Adrien Bousseau, Inria, Universite Cote d’Azur, France
Marcel Campen, Osnabrück University, Germany
Alexandra Diehl, University Zurich, Switzerland
Fabio Ganovelli, ISTI-CNR, Italy
Adrien Gruson, McGill University, Canada
Bernhard Kerbl, TU Wien, Austria
Thomas Leimkühler, Inria and Univ. Cote d’Azur, France
Christian Lessig, Otto-von-Guericke-Universität Magdeburg, Germany
Hsueh-Ti Derek Liu, University of Toronto, Canada
Libin Liu, Disney Research, USA
Marco Livesu, IMATI CNR, Italy
Ricardo Marroquim, Delft University of Technology, The Netherlands
Monique Meuschke, University of Magdeburg, Germany
Ehsan Miandji, INRIA, France
Matthias Müller, NVIDIA, USA
Claudio Mura, University of Zurich, Switzerland
Romain Pacanowski, LP2N-CNRS, Italy
Sören Pirk, Google Inc., USA
Reinhold Preiner, Graz University of Technology, Austria
Leonardo Scandolo, Delft University of Technology, The Netherlands
Johanna Schmidt, VRVis Research, Austria
Hubert P. H. Shum, Northumbria University, United Kingdom
Gurprit Singh, MPI for Informatics, Saarbrücken, Germany
Kiwon Um, Telecom Paris, France
Philipp Urban, Fraunhofer IGD, Germany
Chi Wang, Huawei, China
He Wang, University of Leeds, United Kingdom
Michael Weinmann, University of Bonn, Germany
Jungdam Won, Seoul National University, South Korea
External Reviewers

Alain, Martin
Alla Chaitanya, Chakravarty Reddy
Aristidou, Andreas
Arora, Rahul
Bako, Steve
Ballester, Rafael
Bang, Seungbae
Bern, James
Bertel, Tobias
Bui, Huu Phuoc

Table of Contents

Modeling and Rendering

Ray Tracing Lossy Compressed Grid Primitives ................................. 1
Carsten Benthin, Karthik Vaidyanathan, and Sven Woop

Gaming in Elliptic Geometry .................................................... 5
László Szirmay-Kalos and Milán Magdics

Modeling and Actuation of Cable-driven Silicone Soft Robots .................. 9
Mihail Frâncu

Interactive Synthesis of 3D Geometries of Blood Vessels ......................... 13
Nikolaus Rauch and Matthias Harders

Data-driven Garment Pattern Estimation from 3D Geometries ..................... 17
Chihiro Goto and Nobuyuki Umetani

Visualising the Transition of Large Networks via Dimensionality Reduction to Illustrate the Evolution of the Human Brain ................................. 21
Florian Ganglberger, Joanna Kaczanowska, Wulf Haubensak, and Katja Bühler

Imaging and Video

Visualizing Errors in Rendered High Dynamic Range Images .................... 25
Pontus Andersson, Jim Nilsson, Peter Shirley, and Tomas Akenine-Möller

Automatic Hierarchical Arrangement of Vector Designs ........................ 29
Matthew Fisher, Vineet Agarwal, and Tarun Beri

Bregman Approach to Single Image De-Raining .................................. 33
László Szirmay-Kalos and Márton Tóth

Robust Image Denoising using Kernel Predicting Networks ....................... 37
Zhilin Cai, Yang Zhang, Marco Manzi, Cengiz Oztireli, Markus Gross, and Tunç Ozan Aydin

Animation and Visualization

Soft Walks: Real-Time, Two-Ways Interaction between a Character and Loose Grounds .... 41
Chloé Paliard, Eduardo Alvarado, Damien Rohmer, and Marie-Paule Cani

Interactive Finite Element Model of Needle Insertion and Laceration .......... 45
Pedro Henrique Suruagy Perrusi, Paul Baksic, and Hadrien Courtecuisse

Tight Normal Cone Merging for Efficient Collision Detection of Thin Deformable Objects ........ 49
Dong-Hoon Han, Chang-Jin Lee, Sangbin Lee, and Hyeong-Seok Ko

Interactive Simulation for easy Decision-making in Fluid Dynamics ................ 53
Mengchen Wang, Nicolas Férey, Frédéric Magoulès, and Patrick Bourdot
Table of Contents

Auto-rigging 3D Bipedal Characters in Arbitrarily Poses ............................................................... 57
Jeonghwan Kim, Hyeonta Son, Jinseok Bae, and Young Min Kim

Visual Analysis of Point Cloud Neighborhoods via Multi-Scale Geometric Measures ...................... 61
Marcel Ritter, Daniel Schiffner, and Matthias Harders
Author Index

Agarwal, Vineet .................................................. 29
Akenine-Möller, Tomas ......................................... 25
Alvarado, Eduardo .............................................. 41
Andersson, Pontus .............................................. 25
Aydin, Tunç Ozan ................................................ 37
Bae, Jinseok ......................................................... 57
Baksic, Paul .......................................................... 45
Benthin, Carsten ................................................... 1
Beri, Tarun ............................................................ 29
Bourdot, Patrick ..................................................... 53
Bühler, Katja ......................................................... 21
Cai, Zhilin ............................................................. 37
Cani, Marie-Paule .................................................. 41
Courtecuisse, Hadrien .......................................... 45
Férey, Nicolas ........................................................ 53
Fisher, Matthew .................................................... 29
