Eurographics Symposium on Rendering 2020
– DL-only Track –
London, UK
29 June - 3 July 2020

Organized by

Program Co-Chairs
Carsten Dachsbacher, Karlsruhe Institute of Technology (KIT), Germany
Matt Pharr, NVIDIA, USA

Conference Co-Chairs
Abhijeet Ghosh, Imperial College London, UK
Tobias Ritschel, University College London, UK
Tim Weyrich, University College London, UK

Proceedings Production Editor
Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)

Sponsored by EUROGRAPHICS Association

DOI: 10.2312/sr.20202013
# Table of Contents

Table of Contents ......................................................................................................................................... iii  
Sponsors ......................................................................................................................................................... iv  
International Programme Committee ........................................................................................................... v  
Author Index ................................................................................................................................................ vi  
Keynote ........................................................................................................................................................ vii  

## Denoising and Filtering

Temporal Normal Distribution Functions ................................................................................................. 1  
*Lorenzo Tessari, Johannes Hanika, Carsten Dachsbacher, and Marc Droske*

Real-time Monte Carlo Denoising with the Neural Bilateral Grid ............................................................. 13  
*Xiaoxu Meng, Quan Zheng, Amitabh Varshney, Gurprit Singh, and Matthias Zwicker*

## Natural Appearance

Multi-Scale Appearance Modeling of Granular Materials with Continuously Varying Grain Properties .... 25  
*Cheng Zhang and Shuang Zhao*

## Path Guiding

Temporal Sample Reuse for Next Event Estimation and Path Guiding for Real-Time Path Tracing .......... 39  
*Addis Dittebrandt, Johannes Hanika, and Carsten Dachsbacher*

## BxDFs

Joint SVBRDF Recovery and Synthesis From a Single Image using an Unsupervised Generative Adversarial Network ................................................................................................................................. 53  
*Yezi Zhao, Beibei Wang, Yanning Xu, Zheng Zeng, Lu Wang, and Nicolas Holzschuch*
International Programme Committee

Miika Aittala, NVIDIA, Finland
Tamy Boubekeur, Adobe, France
Rachel Brown, NVIDIA, USA
Yue Dong, MSR, China
George Drettakis, INRIA, France
Philip Dutré, KU Leuven, Belgium
Elmar Eisemann, TU Delft, Netherlands
Elena Garces, Technicolor, France
Iliyan Georgiev, Solid Angle, UK
Toshiya Hachisuka, University Tokyo, Japan
Eric Heitz, Unity, France
Nicolas Holzschuch, INRIA, France
Wojciech Jarosz, Dartmouth, USA
Nima Kalantari, Texas A&M University, USA
Anton Kaplanyan, Facebook, USA
Jaakko Lehtinen, Aalto University and NVIDIA, Finland
Hendrik Lensch, Tübingen University, Germany
Tzu-Mao Li, MIT, USA
Steve Marschner, Cornell, USA
Belen Masia, Universitiy Zaragoza, Spain
Diego Nehab, IMPA, Brazil
Jan Novak, NVIDIA, Switzerland
Derek Nowrouzezahrai, McGill, Canada
Marta Ortín Obón, University of Zaragoza, Spain
Pieter Peers, College of William & Mary, USA
Fabio Pellacini, Sapienza University of Rome, Italy
Christoph Peters, KIT, Germany
Jeppe Revall Frisvad, Technical University of Denmark, Denmark
Holly Rushmeier, Yale University, USA
Pedro Sander, Hong Kong, China
Peter-Pike Sloan, Activision, USA
Laszlo Szirmay-Kalos, Budapest University of Technology and Economics, Hungary
Karthik Vaidyanathan, Intel, USA
Li-Yi Wei, Univ. of Hong Kong, Hong Kong
Andrea Weidlich, Weta Digital, NZ
Michael Wimmer, TU Wien, Austria
Hongzhi Wu, Zhejiang University, China
Kun Xu, Tsinghua University, China
Lingqi Yan, UC Santa Barbara, USA
Sung-Eui Yoon, KAIST, South Korea
Kun Zhou, Zhejiang University, China
Matthias Zwicker, University of Maryland, USA

Keynote

Generative Models for Image Synthesis

Jan Kautz

Short Biography

Jan Kautz is VP of Learning and Perception Research at NVIDIA. Jan and his team pursue fundamental research in the areas of computer vision and deep learning, including visual perception, geometric vision, generative models, and efficient deep learning. His and his team’s work has been recognized with various awards and has been regularly featured in the media. Before joining NVIDIA in 2013, Jan was a tenured faculty member at University College London. He holds a BSc in Computer Science from the University of Erlangen-Nürnberg (1999), an MMath from the University of Waterloo (1999), received his PhD from the Max-Planck-Institut für Informatik (2003), and worked as a post-doctoral researcher at the Massachusetts Institute of Technology (2003-2006).
