Papers

Towards Supporting Interpretability of Clustering Results with Uncertainty Visualization ..................... 1
Christoph Kinkeldey, Tim Korjakow, and Jesse Josua Benjamin

Uni- and Multi-modal Uncertainty Visualization in 2D Scalar Field Ensembles .............................. 7
Eike Gebauer and Lars Linsen

Detection of Confirmation and Distinction Biases in Visual Analytics Systems .............................. 13
Atilla Alpay Nalcaci, Dilara Girgin, Semih Balki, Fatih Talay, Hasan Alp Boz, and Selim Balcisoy

Examining the Components of Trust in Map-Based Visualizations ............................................ 19
Cindy Xiong, Lace M. K. Padilla, Kent Grayson, and Steven Franconeri

Trust in Information Visualization .................................................. 25
Eva Mayr, Nicole Hynek, Saminu Salisu, and Florian Windhager
Proceedings Information

The first EuroVis Workshop on Trustworthy Visualization (TrustVis), formerly known as EuroRVVV, was co-organized by Noeska Smit (University of Bergen), Kai Lawonn (University of Koblenz - Landau), Lars Linsen (Universität Münster), and Robert Kosara (Tableau). TrustVis is a continuation of the EuroRVVV workshop, which was held six times in conjunction with EuroVis and IEEE VIS. TrustVis includes the topics covered by EuroRVVV – Reproducibility, Verification, and Validation in visualization – and also widens the scope. The call for papers this year focused on the topic of trust in visualization. Submitted papers were peer-reviewed in a one-stage process by an international program committee, and five papers were accepted for presentation. The full program featured a combination of paper presentations and invited talks.
