

VIPRA 2024

1st Visual Process Analytics Workshop Co-Located with EuroVis 2024

Odense, Denmark
May 27, 2024

Workshop Chairs

Alessio Arleo, TU Eindhoven, The Netherlands
Stef van den Elzen, TU Eindhoven, The Netherlands
Tatiana von Landesberger, University of Cologne, Germany
Jana-Rebecca Rehse, University of Mannheim, Germany
Luise Pufahl, University of München, Germany
Francesca Zerbato, TU Eindhoven, The Netherlands

Proceedings Production Editor

Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)

Sponsored by EUROGRAPHICS Association

Table of Contents

Papers

- | | |
|----------------|---|
| vipra.20241101 | Designing and Evaluating a Structural Model for Conformance Checking Visualizations
<i>Finn Klessascheck, Tom Knoche, and Luise Pufahl</i> |
| vipra.20241102 | Interacting with Large Process Data: Challenges in Visual Exploration
<i>Georgiy Shurkhovetsky, Pol Schumacher, and Philipp Koytek</i> |
| vipra.20241103 | Interpretability Challenges for Discovered Process Models: A User Study and Prototype Solution
<i>Ruben Brinkman, Felix Mannhardt, Robin J. P. Mennens, and Roeland J. Scheepens</i> |
| vipra.20241104 | Review of Visual Encodings in Common Process Mining Tools
<i>Steven Knoblich, Jan Mendling, and Helena Jambor</i> |
| vipra.20241105 | Visual Journey Analytics: Lessons Learned from Real-world Implementations
<i>Richard Brath, Paul Andersen, Martin Matusiak, and Raymond Gerber</i> |

International Programme Committee

Anti Alman, University of Tartu
Iris Beerepoot, Utrecht University
Andrea Burattin, Technical University of Denmark
Francisco Maria Calisto, University of Lisbon
Jan Mendling, Humboldt-Universität zu Berlin
Velitchko Filipov, Technical University of Vienna
Katerina Vrotsou, Linköping University
Barbara Weber, University of St. Gallen
Manuel Resinas, University of Sevilla
Sebastian Van Zelst, Celonis Labs - München
Silvia Miksch, Technical University of Vienna
Catagay Turkay, University of Warwick
Daniel Schuster, Fraunhofer FIT - University of Aachen
Davide Ceneda, Technical University of Vienna
Pnina Soffer, University of Haifa
Christian Tominski, University of Rostock
Mari-Cruz Villa-Uriol, University of Sheffield
Davide Ceneda, Technical University of Vienna
Max Sondag, University of Konstanz
David Gotz, University of North Carolina at Chapel Hill

Keynote

You won't believe what can save process mining! [Answer at the end]

Andrea Burattin

Abstract

Over the last couple of decades, process mining has grown into a well-established discipline that aims to extract valuable knowledge regarding business processes, starting from execution data. As a discipline rooted in Computer Science, the focus of process mining has historically revolved around computational aspects (e.g., formal modeling and algorithms), oftentimes neglecting aspects related to results communication and understandability. As process mining algorithms have become more mature and more capable of handling unstructured settings, their application areas have broadened, for example, into healthcare, education, and law. In these domains, however, new vital challenges are emerging in communicating the results back to the end users, who are domain experts unfamiliar with process mining formalities. Leveraging the knowledge and experience acquired in visual analytics can help process mining define new approaches to deliver process mining insights and actionable results to domain experts.

Short Biography

Andrea Burattin has been an Associate Professor at the Technical University of Denmark since April 2019. Previously, he worked as an Assistant Professor at the same university and as a postdoctoral researcher at the University of Innsbruck (Austria) and at the University of Padua (Italy). In 2013, he obtained his Ph.D. degree through a joint Ph.D. School between the University of Bologna and Padua (Italy), which received the Best Process Mining Dissertation Award from the IEEE Task Force on Process Mining. He served as PC chair of ICPM in 2022, PC chair of BPM in 2023, and will be General Chair of ICPM in 2024. He also serves as the organizer of workshops and special issues and as a program committee member of several other conferences. He is a steering committee member of the IEEE Task Force on Process Mining.
