

An Exploration of Practice and Preferences for the Visual Communication of Biomedical Processes

README

Online Submission ID: 1002

In this directory we include a number of supplementary materials that may aid the review process.

1. Supplementary material details: **1-supplementary-material-details.pdf** serves as a primary supplement to our work. This document provides interested readers a deeper layer of topic-specific details on (1) asset scores, (2) attribute rankings, and (3) keywords.
2. Assets: **2-assets** directory contains all source assets that we created for our study. Assets are organized into sub-directories by topic, and named according to their labels shown in Figs. 1 and 4 of the manuscript, e.g., choice1, choice2, etc. This may be useful particularly to view the animated assets (GIFs).
3. Data: **3-results.xlsx** contains the results of our survey, and was the input to the per-topic result visualizations available on Tableau Public: <https://public.tableau.com/profile/biomedsurvey2021>
4. Salon Judging Form: (**4-Judging-Form-General.pdf**) Association of Medical Illustrators (AMI) salon judging form that served as a large inspiration source in designing our survey.
5. Survey screenshots: **5-survey-screenshots** directory contains three PDFs (**1-micro-screenshots-collated.pdf**, **2-meso-screenshots-collated.pdf**, **1-macro-screenshots-collated.pdf**) that contain collated screenshots of all pages within each survey segment that we distributed.
