\* Indicates required question

## 1. Participant ID \*

---

### Overview - Task

The graph describes a **network of animal interactions**. Such graphs can be used to infer **social hierarchies** or track **disease transmission** between animals.

What **general characteristics** can you spot from a global overview? Which **nodes** seem **significant** or **interesting** to you and why? What **overarching structures** can you identify?

Explore freely and let us know when you are finished.

## 2. \*

---

---

### Overview - Start

Overall characteristics can be used to describe networks in general. In this task you will estimate/determine some of these characteristics.

8. Please share any thoughts about the task here. \*
