

EG VCBM 2015

Eurographics Workshop on Visual Computing for Biology and Medicine

Chester, UK
September 14 – 15, 2015

Programme Chairs

Katja Bühler, VRVis Vienna
Lars Linsen, Jacobs University, Germany
Nigel W. John, University of Chester, UK

Local Organization

Nick Avis, University of Chester, UK
Franck Vidal, Bangor University, UK

Proceedings Production Editor

Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)

Dieter W. Fellner, Werner Hansmann, Werner Purgathofer, François Sillion
Series Editors

Segmentation and Registration

CoWRadar: Visual Quantification of the Circle of Willis in Stroke Patients	1
<i>Haichao Miao, Gabriel Mistelbauer, Christian Našel, and M. Eduard Gröller</i>	
Visual Analysis of Medical Image Segmentation Feature Space for Interactive Supervised Classification	11
<i>Vladimir Molchanov, Teodora Chitiboi, and Lars Linsen</i>	
Uncertainty Estimation and Visualization for Multi-modal Image Segmentation	21
<i>Ahmed Al-Taie, Horst K. Hahn, and Lars Linsen</i>	
Image Registration Methods for Patient-Specific Virtual Physiological Human Models	31
<i>Julia E. E. de Oliveira, Paul Giessler, and Thomas M. Deserno</i>	

Molecular Visualization and Visual Analytics

<i>FoldSynth</i> : Interactive 2D/3D Visualisation Platform for Molecular Strands	41
<i>Stephen Todd, Peter Todd, Frederic Fol Leymarie, William Latham, Lawrence A. Kelley, Michael Sternberg, Jim Hugues, and Stephen Taylor</i>	
Instant Visualization of Secondary Structures of Molecular Models	51
<i>Pedro Hermosilla, V. Guallar, Alvar Vinacua, and Pere-Pau Vázquez</i>	
cellVIEW: a Tool for Illustrative and Multi-Scale Rendering of Large Biomolecular Datasets	61
<i>Mathieu Le Muzic, Ludovic Autin, Julius Parulek, and Ivan Viola</i>	
Discovering Medical Knowledge Using Visual Analytics	71
<i>Werner Sturm, Tobias Schreck, Andreas Holzinger, and Torsten Ullrich</i>	

Volume Visualization

Interactive Position-dependent Customization of Transfer Function Classification Parameters in Volume Rendering	83
<i>Tobias Brix, Aaron Scherzinger, Andreas Völker, and Klaus Hinrichs</i>	
Motion-moderated Transfer Function for Volume Rendering 4D CMR Data	93
<i>Simon Walton, Min Chen, and Cameron Holloway</i>	

Table of Contents

Illustrative Multi-volume Rendering for PET/CT Scans	103
<i>Kai Lawonn, Noeska Smit, Bernhard Preim, and Anna Vilanova</i>	
Fiber Stipples for Crossing Tracts in Probabilistic Tractography	113
<i>Andre Reichenbach, Mathias Goldau, and Mario Hlawitschka</i>	
Visual Computing for Vessel Structures	
Automated Slice-Based Artery Identification in Various Field-of-View CTA Scans	123
<i>David Major, Alexey A. Novikov, Maria Wimmer, Jiri Hladuvka, and Katja Bühler</i>	
A Two-Level Cascade Classification Algorithm for Real-Time Bifurcation Detection in CTA Images of Blood Vessels	131
<i>Alexey A. Novikov, Maria Wimmer, David Major, and Katja Bühler</i>	
A Survey of Cardiac 4D PC-MRI Data Processing	139
<i>Benjamin Köhler, Silvia Born, Roy F. P. van Pelt, Uta Preim, and Bernhard Preim</i>	
Histology-Based Evaluation of Optical Coherence Tomographic Characteristics of the Cerebral Artery Wall via Virtual Inflating	149
<i>Sylvia Glaßer, Thomas Hoffmann, Axel Boese, Samuel Voß, Thomas Kalinski, Martin Skalej, and Bernhard Preim</i>	
Haptics and Interaction	
Haptics-based Modelling of Pigmented Skin Lesions	159
<i>Alejandro Granados, James Bryan, Taha Abdalla, Genevieve Osborne, and Fernando Bello</i>	
Simulation-based Ultrasound Training Supported by Annotations, Haptics and Linked Multimodal Views	167
<i>Yuen C. Law, Thomas Knott, Sebastian Pick, Benjamin Weyers, and Torsten W. Kuhlen</i>	
Exploration of 3D Medical Image Data for Interventional Radiology using Myoelectric Gesture Control	177
<i>Julian Hettig, André Mewes, Oleksandr Riabikin, Martin Skalej, Bernhard Preim, and Christian Hansen</i>	
QuantiScale: A Study in Redesigning Interactions for Multi-Touch	187
<i>Felix Ritter, Jumana Al Issawi, and Simon Benten</i>	
Schematic Electrode Map for Navigation in Neuro Data Sets	195
<i>Christian Schulte zu Berge, Jakob Weiss, and Nassir Navab</i>	

Table of Contents

Posters

Accuracy Assessment of Free Hand Grasping Interaction in Mixed Reality	205
<i>Maadh Al Kalbani and Ian Williams</i>	
Challenges and Technologies for Low Cost Wheelchair Simulation	207
<i>Christopher J. Headleand, Thomas Day, Serban R. Pop, Panagiotis D. Ritsos, and Nigel W. John</i>	
SWiFT Seeing the Wood From the Trees: helping people make sense of their health data	209
<i>Dan Brown, David Duce, Rachel Franklin, Rachel Harrison, Clare Martin, and Marion Waite</i>	
Visualisation of PET data in the Fly Algorithm	211
<i>Zainab Ali Abbood, Jean-Marie Rocchisani, and Franck P. Vidal</i>	
Simulated Motion Artefact in Computed Tomography	213
<i>Franck P. Vidal and Pierre-Frédéric Villard</i>	
A Haptics-enabled Simulator for Transperineal Ultrasound-Guided Biopsy	215
<i>Panagiotis D. Ritsos, Marc R. Edwards, Iqbal S. Shergill, and Nigel W. John</i>	
A Statistical Method for Surface Detection	217
<i>Samuel Smith and Ian Williams</i>	
Automatic Real-time Annotation of Important Landmarks in Ultrasound-Guided Femoral Nerve Blocks	219
<i>Frank Lindseth, Linda Leidig, and Erik Smistad</i>	
Parametric-based Reconstruction Of 3D Mesh Models; Towards the Generation of a Parametric Human Foot Biomodel	221
<i>Alexander Agathos and Philip Azariadis</i>	

International Program Committee

Jan Aerts, KU Leuven, Belgium
Fernando Bello, Imperial College London
Stefan Bruckner, University of Bergen, Norway
Stephane Cotin, Inria, France
Thomas Deserno (RWTH Aachen, Germany)
Nils Gehlenborg Harvard Medical School, USA
Carsten Görg University of Colorado, USA
Enrico Gobetti, CRS4, Italy
Eduard Gröller TU Wien, Austria
Hans-Christian Hege, Zuse Institute Berlin, Germany
Markus Hadwiger KAUST, Saudi-Arabia
Anja Hennemuth Fraunhofer MEVIS, Bremen, Germany
Arnim Jenette (CNRS France)
Bernhard Kainz, Imperial College London, UK
Heike Lette Universität Heidelberg, Germany
Vincent Luboz, Laboratoire TIMC-IMAG, France
Claes Lundström, Linköping University, Sweden
Dorit Merhof, RWTH Aachen University, Germany
Miriah Meyer (University of Utah, USA)
Klaus Mueller, Stony Brook University, USA
Vijay Natarajan Indian Institute of Science, Bangalore, India
Bernhard Preim, University of Magdeburg, Germany
Jos Roerdink University of Groningen, Netherlands
Timo Ropinski Linköping University, Sweden
Falk Schreiber, University Halle-Wittenberg, Germany
Heidrun Schumann, University of Rostock, Germany
Alexei Sourin, Nanyang Technological University, Singapore
Marc Streit, Johannes Kepler University Linz, Austria
Franck Vidal, Bangor University, Wales, UK
Pierre-Frederic Villard, University of Lorraine, France
Ivan Viola, Vienna University of Technology, Austria
Wolfgang Wein, Technische Universität, München, Germany
Stefan Wesarg Fraunhofer IGD Darmstadt, Germany
Michel Westenberg, TU Eindhoven, The Netherlands
Rafael Wiemker, Philips Research, Hamburg, Germany
Burkhard Wuensche, University of Auckland, New Zealand

Keynote

What is Life? A Systems Biology Perspective

Denis Noble

Biographical Note

Professor Denis Noble CBE FRS FRCP is a British biologist who held the Burdon Sanderson Chair of Cardiovascular Physiology at the University of Oxford from 1984 to 2004 and was appointed Professor Emeritus and co-Director of Computational Physiology. He is one of the pioneers of Systems Biology and developed the first viable mathematical model of the working heart in 1960.

Noble's research focuses on using computer models of biological organs and organ systems to interpret function from the molecular level to the whole organism. Together with international collaborators, his team has used supercomputers to create the first virtual organ, the virtual heart.

As Secretary-General of the International Union of Physiological Sciences 1993-2001, he played a major role in launching the Physiome Project, an international project to use computer simulations to create the quantitative physiological models necessary to interpret the genome, and he was elected President of the IUPS at its world congress in Kyoto in 2009.

Noble is also a philosopher of biology, and his book *The Music of Life* challenges the foundations of current biological sciences, questions the central dogma, its unidirectional view of information flow, and its imposition of a bottom-up methodology for research in the life sciences.

Keynote

Numerical Simulation in Medicine: From Training to Per-operative Guidance.

Stephane Cotin

Abstract

The variety, complexity and central role of modern medicine have been a strong motivation for many recent scientific developments. While medical imaging has become an integral part of today's medicine, new fields are emerging, such as robotics, simulation, augmented reality, or workflow analysis. In this talk I will highlight the increasingly important role of (real-time) numerical simulation in various domains, such as training, but also for planning and in the assistance of complex interventions. I will illustrate the impact of simulation through a series of results in various areas of medicine, such as interventional radiology, ophthalmology, and laparoscopic surgery. Finally I will discuss some of the remaining challenges that still hinder the use of computational anatomy and simulation in medicine.

Biographical Note

Stephane Cotin joined INRIA in 2007 as Research Director. Since January 2010 he has lead the SHACRA group, a multidisciplinary team of scientists involved in the field on medical simulation. Stephane also manages the development of a Large Scale Initiative on Medical Simulation,

Stephane is a senior research scientist with experience in biomechanical modeling, real-time simulation, and physics-based modeling. Specialized in medical applications, from training to planning of complex medical procedures. Management of several projects and teams.
