Proceedings

Expressive 2018

Computational Aesthetics
Sketch-Based Interfaces and Modeling
Non-Photorealistic Animation and Rendering

Victoria, British Columbia, Canada
August 17 – 19, 2018

General Chairs

Brian Wyvill (University of Victoria, Canada)
Hongbo Fu (City University of Hong Kong, Hong Kong)

Paper Chairs

Tunç Aydın (Disney Research Zurich, Switzerland)
Daniel Sýkora (Czech Technical University in Prague, Czech Republic)

Art Chair

Jane Prophet (University of London, United Kingdom)

Proceedings Production Editor

Stephen N. Spencer, University of Washington

Co-sponsored by ACM SIGGRAPH and Eurographics
Table of Contents

Preface ........................................................................................................................................................................................... 5

Paper Session 1: Sketching

3D Sketching for Interactive Model Retrieval in Virtual Reality ................................................................. Article 1
Daniele Giunchi, Stuart James, Anthony Steed

The Role of Grouping in Sketched Diagram Recognition ........................................................................... Article 2
Amirhossein Ghodrati, Rachel Blagojevic, Hans W. Guesgen, Stephen Marsland, Beryl Plimmer

Context-based Sketch Classification ...................................................................................................................... Article 3
Jianhui Zhang, Yilan Chen, Lei Li, Hongbo Fu, Chiew-Lan Tai

Session 2: Between 2.5D and 3D

Structuring and Layering Contour Drawings of Organic Shapes ................................................................. Article 4
Even Entem, Amal Dev Parakkat, Marie-Paule Cani, Loïc Barthe

Seamless Reconstruction of Part-Based High-Relief Models from Hand-Drawn Images ................................... Article 5
Marek Dvorožnáč, Saman Sepehri Nejad, Ondřej Jamriška, Alec Jacobson, Ladislav Kavan, Daniel Šykora

Sculpture Paintings ............................................................................................................................................... Article 6
Sami Arpa, Sabine Süsstrunk, Roger D. Hersch

Implicit Representation of Inscribed Volumes ...................................................................................................... Article 7
Parto Sahbaei, David Mould, Brian Wyvill

Session 3: Stylization Before and Now

Abstract Depiction of Human and Animal Figures: Examples from Two Centuries of Art and Craft ............ Article 8
Neil A. Dodgson

Santiago E. Montesdeoca, Hock Soon Seah, Amir Semmo, Pierre Bénard, Romain Vergne, Joëlle Thollot, Davide Benvenuti

Motion-coherent stylization with screen-space image filters ........................................................................ Article 10
Alexandre Bléron, Romain Vergne, Thomas Hurtut, Joëlle Thollot

Reducing Affective Responses to Surgical Images through Color Manipulation and Stylization ............... Article 11
Lonni Besançon, Amir Semmo, David Blau, Bruno Frachet, Virginie Pineau, El Hadi Sariali, Rabah Taouachi, Tobias Isenberg, Pierre Dragicevic
## Table of Contents

### Session 4: Virtual Brushes

Brush Stroke Synthesis with a Generative Adversarial Network Driven by Physically Based Simulation ................... Article 12  
*Rundong Wu, Zhili Chen, Zhaowen Wang, Jimei Yang, Steve Marschner*

Fluid Brush...................................................................................................................................................................... Article 13  
*Sarah Abraham, Etienne Vouga, Donald Fussell*

Computational Light Painting and Kinetic Photography .................................................................................................... Article 14  
*Yaozhun Huang, Sze-Chun Tsang, Hei-Ting Tamar Wong, Miu-Ling Lam*

Pigmento: Pigment-Based Image Analysis and Editing  
*Jianchao Tan, Stephen DiVerdi, Jingwan Lu, Yotam Gingold*  
(Journal Presentation - IEEE TVCG)

### Session 5: Cartoons & Beyond

2D Shading for Cel Animation ....................................................................................................................................... Article 15  
*Matis Hudon, Rafael Pagés, Mairéad Grogan, Jan Ondřej, Aljoša Smolič*

ToonCap: A Layered Deformable Model for Capturing Poses From Cartoon Characters ............................................. Article 16  
*Xinyi Fan, Amit H. Bermano, Vladimir G. Kim, Jovan Popović, Szymon Rusinkiewicz*

Automatic Generation of Geological Stories from a Single Sketch ............................................................................... Article 17  
*Maxime Garcia, Marie-Paule Cani, Rémi Ronfard, Claude Gout, Christian Perrenoud*

### Poster Abstracts

An ego-altruist society .................................................................................................................................................... Article 18  
*Pedro M. Cruz, André B. Cunha*

Approaches for Local Artistic Control of Mobile Neural Style Transfer ................................................................. Article 19  
*Max Reimann, Mandy Klingbeil, Sebastian Pasevaldt, Amir Semmo, Jürgen Döllner, Matthias Trapp*

Stylized Stereoscopic 3D Line Drawings from 3D Images......................................................................................... Article 20  
*Lesley Istead, Craig S. Kaplan*

Organizing and Program Committees.................................................................................................................. 6
Author Index............................................................................................................................................................ 8
Preface

On behalf of the Expressive chairs we welcome delegates to the University of Victoria, British Columbia. Our school acknowledges that we work as visitors on the traditional territory of the WSÁNEĆ (Saanich), Lkwungen (Songhees), Wyomilth (Esquimalt) peoples of the Coast Salish Nation.

The Expressive conference series was born out of three workshops; CAe - Computational Aesthetics, SBIM - Sketch Based Interfaces Modelling and animation and NPAR - Non-Photo Realistic Animation and Rendering. The amalgamation has brought together artists, scientists, researchers and practitioners to showcase cutting-edge research and artistic innovation in these disciplines. We are jointly sponsored by Eurographics and ACM SIGGRAPH and are grateful for a generous donation from Disney Research. The conference is now in the fourteenth year of running under the Expressive banner.

This year we received 32 full paper submissions out of which 17 were accepted as papers (53% acceptance rate) and 2 as posters. There was also one general submission accepted as a poster and one journal paper accepted for presentation. Accepted papers will be presented in 5 sessions: Sketching, Between 2.5D and 3D, Stylization Before and Now, Virtual Brushes, and Cartoons & Beyond. We will also be hosting four exciting keynotes by Maryann Simmons (Senior Software Engineer, Walt Disney Animation Studios), Steve DiPaola (Professor and Chair of the Cognitive Science Program, Simon Fraser University), Andrew Pearce (VP of Global Technology, DreamWorks Animation), and Peter Blaskovic (Founder and CEO, Escape Motions).

In these days when there is much discord in the world we hope you will take the opportunity to enjoy a peaceful break from world politics and visit the friendly people and many beauty spots of Vancouver Island. Canada’s west coast is not only home to the mildest weather in Canada, but also Victoria boasts the fabulous Butchart gardens, and the coastal waters are visited by many species of whale and other marine life. The nearby islands all have unique characters and worth a visit, while inland the mountains of Strathcona park are full of great hikes and climbs for all.

Thank you for attending the conference and we hope you will enjoy your visit to Vancouver Island.
