Education Papers

Education Program Co-Chairs
Gitta Domik, University of Paderborn, Germany
Riccardo Scateni, University of Cagliari, Italy

Committee Members
Mark Chavez (Singapore)
Giovanni Gallo (Italy)
Andrea Giachetti (Italy)
Frank Hanisch (Germany)
Werner Hansmann (Germany)
Lars Kjelldahl (Sweden)
Cary Laxer (USA)
Michael McGrath (USA)
Isabel Navazo (Spain)
Scott Owen (USA)
Beatriz Sousa Santos (Portugal)
Peter Weishar (USA)
# Table of Contents

## Games in Education

Applications of Multitouch & Gaming Technology for the Classroom .......................... 1
*William Muto, Justin Dobies, and Paul Diefenbach*

*Eike Falk Anderson and Christopher E. Peters*

Learning by Fixing and Extending Games ................................................................. 15
*Giulia Costantini, Giuseppe Maggiore, and Agostino Cortesi*

## Teaching Computer Graphics to Undergraduates

Using processing.org in an Introductory Computer Graphics Course ......................... 23
*Jordi Linares Pellicer, Jordi Santonja Blanes, Pau Micó Tormos, and David Cuesta Frau*

Easel: A Java Based Top-Down Approach to 3D Graphics Education .......................... 29
*Philip J. Rhodes and Baoqiang Yan*

Applet Competition as an Educational Tool in Creating Novel e-Textbook .................. 37
*Silvester Czanner, Andrej Ferko, Juraj Stugel, and Pavla Nunukova*

## Teaching More than the Standard CG Curriculum

Introducing Students to Empirical Methods in CG and HCI Courses through User Studies ................................. 45
*Beatriz Sousa Santos, P. Dias, S. Silva, C. Ferreira, and J. Madeira*

Teaching Quaternions is not Complex ................................................................. 51
*John McDonald*

How to Write a Visualization Research Paper: The Art and Mechanics ......................... 59
*Robert S. Laramee*

## Interdisciplinarity

Teaching Computer Graphics in the Context of Theatre ........................................... 67
*Marla K. Schweppe and Joe Geigel*

Computer Animation Curriculum: An Interdisciplinary Approach ............................. 73
*Caroline Larboulette*
Preface

Welcome to the Eurographics 2009 Education Programme in Munich, Germany! Through all the selected papers we could feel the passion for teaching computer graphics. It is a stimulating collection of papers where educators inform of novel and alternative ways to teach computer graphics or to use computer graphics to motivate other (computer related) areas.

What you can expect are presentations on

- games in education
- alternative ways of teaching computer graphics to undergraduates
- using computer graphics as a motivation to teach undergraduate students
- teaching topics beyond standard 3d graphics, such as empirical models or quaternions
- interdisciplinary courses.

We are very grateful to the people who made these proceedings possible:

- the authors for their contributions
- reviewers for their good and timely reviews within tight deadlines
- G. Scott Owen and Isabel Navazo for joining us in chairing the sessions
- Stefanie Behnke and the EG support team for making submissions and review process uncomplicated
- and last but not least Rüdiger Westermann for his continuous help with advertising, generating and organizing this program.

This year marks the 30th Eurographics Conference and the 5th Education Papers Programme. The education track is enhanced by the Computer Graphics Education workshop taking place two days before the conference. The workshop as well as many authors and reviewers of this Education Programme have their roots in the joint education efforts of Eurographics and ACM Siggraph. It is a blessing for educators in computer graphics that the education committees of both organizations work so well together. Therefore, a big thanks to the current education committee heads (Isabel Navazo, Eurographics Education Board Chair and Rick Barry, ACM Siggraph Director for Education) and all the past directors for supporting joint education activities in computer graphics.

We hope you will enjoy this year’s Education Papers and leave Munich with innovative ideas and new motivation for your educational work back home.

Education Programme Chairs:
Gitta Domik, University of Paderborn, Germany (domik@uni-paderborn.de)
Riccardo Scateni, University of Cagliari, Italy (riccardo@unica.it)
