Preface

These proceedings contain the Short Papers for Eurographics 2005, the 26th Conference of the European Association for Computer Graphics, held at Trinity College in Dublin, Ireland, between the 29th of August and the 2nd of September 2005.

The EG Short Presentations were first introduced at Eurographics ’98 as a forum for presenting new ideas, late-breaking results and work in progress in a reduced length format. This year, authors present their work in a 10 minute talk at one of the four parallel short paper sessions and additionally as a poster at the combined Reception for Posters, Animations and Pixar Award, where the papers can be discussed in an informal atmosphere. As a further change this year, a special prize of EUR 500 sponsored by Science Foundation Ireland will be awarded to the best student short paper, written and presented at the conference by a full-time student.

We received a total of 83 submissions out of which 32 were chosen for publication after a thorough review process, where each paper was reviewed by at least two independent experts in the relevant areas. A number of high-quality submissions could unfortunately not be included due to space and time limitations but we would like to thank all the authors for their valuable contribution to the program.

We would also like to express our gratitude to all the reviewers, the session chairs, and especially to Stefanie Behnke and the staff at TU Braunschweig for all their help during the submission and review process.

We hope that you will enjoy this year’s program and we look forward to seeing you all at the Reception.

John Dingliana and Fabio Ganovelli
## List of Reviewers

</table>
Index

SP1a  Meshes

Constriction Computation using Surface Curvature
Frank Hétroy  1

Real-Time Marching Cubes on the Vertex Shader
Frank Goetz, Theodor Junklewitz, Gitta Domik  5

Fast and Controllable 3D Modelling From Silhouettes
Mukta Prasad, Andrew Fitzgibbon, Andrew Zisserman  9

A Sharpness Dependent Approach to 3D Polygon Mesh Hole Filling
Chun-Yen Chen, Kuo-Young Cheng, H.Y. Mark Liao  13

Scalar Tagged PN Triangles
Tamy Boubekeur, Christophe Schlick, Patrick Reuter  17

SP1b  Virtual Artists

Carving, Painting, and Printing with a Pen Tablet
Shinji Mizuno, Daigo Kobayashi, Minoru Okada, Junichiro Toriwaki, Shinji Yamamoto  21

Sculpting in Augmented Reality
Jayson Mackie  25

Model-driven Virtual Mezzotint Techniques
Daisuke Tasaki, Shinji Mizuno, Minoru Okada  29

SP2a  Motion Control

Walking with Pens
Philipp Kolhoff, Jacqueline Preuß, Jörn Loviscach  33

Proactive Steering Toward Oriented Targets
Ronan Boulic  37

Real-time Upper Body 3D Pose Estimation from a Single Uncalibrated Camera
Antonio Salvatore Micilotta, Eng Jon Ong, Richard Bowden  41

Path Planning for Crowds: From Shared Goals to Individual Behaviors
Julien Pettre, Daniel Thalmann,  45
SP2b  Images and Video

Perception-Based Rendering: Eyes Wide Bleached
Diego Gutierrez, Oscar Anson, Adolfo Munoz, Francisco J. Seron

Differential Photon Mapping - Consistent Augmentation of Photographs with Correction of all Light Paths
Thorsten Grosch

Video Textures Exploiting Symmetric Movements
William Van Haevre, Frank Van Reeth

Image Reconstruction Invariant to Relighting
Todor Georgiev

SP3a  Rendering Natural Phenomena

Real-Time Rendering of Cloudy Natural Phenomena with Hierarchical Depth Impostors
Tamás Ummenhoffer, László Szirmay-Kalos

Leaf Cluster Impostors for Tree Rendering with Parallax
Ismael Garcia, Mateu Sbert, László Szirmay-Kalos

Rendering Realistic Trees and Forests in Real Time
Alberto Candussi, Nicola Canduss, Tobias Höllerer

SP3b  Simulation and Modelling

Efficient, Physically Plausible Finite Elements
Matthieu Nesmé, François Faure, Yohan Payan

Predicting Natural Hair Shapes by Solving the Statics of Flexible Rods
Florence Bertails, Basile Audoly, Bernard Querleux, Frédéric Leroy, Jean-Luc Lévêque, Marie-Paule Cani

Fast Body-Cloth simulation with moving humanoids
Javier Rodriguez-Navarro, Miguel Sainz, Antonio Susin

Facial Motion Cloning Using Global Shape Deformation
Marco Fratracangeli, Marco Schaerf

Progressive Cartesian Inequality Constraints for the Inverse Kinematic Control of Articulated Chains
Manuel Peinado, Ronan Boulic, Benoit Le Callennec, D. Meziet
**SP4a Immersion and Perception**

A 3D Perceptual Metric using Just-Noticeable-Difference
Irene Cheng, Pierre Boulanger

97

A Visual Quality Prediction Model for 3D Texture
Irene Cheng, Pierre Boulanger

101

Interactive Manipulation Of Projections With a Curved Perspective
Nisha Sudarsanam, Cindy M Grimm, Karan Singh

105

A Scalable Hardware and Software System for the Holographic Display of Interactive Graphics Applications
Tibor Balogh, Tamás Forgács, Tibor Agács, Olivier Balet, Eric Bouvier, Fabio Bettio, Enrico Gobbetti, Gianluigi Zanetti

109

Improving the Experience of Scenes with a Large Field of View using Shift Lens Perspective
Aldo Hoeben, Pieter Jan Stappers

113

**SP4b Real-Time Rendering**

Photon Map Gathering on the GPU
Szabolcs Czuczor, László Szirmay-Kalos, László Szécsi, László Neumann

117

Spherical Harmonic Lighting of Wavelength-Dependent Phenomena
Clifford Lindsay, Emmanuel Agu

121

Estimating Mobile Memory Requirements and Rendering Time for Remote Execution of the Graphics Pipeline
Kutty Banerjee, Emmanuel Agu, Fan Wu

125
