Preface

This year, we have received more than 20 tutorial proposals, all very much in the areas of interest of Eurographics. This shows that Eurographics attracts a lot of interest from the researchers community.

As usual, it was not possible to accept them all and priorities have been set up in terms of general interest, popular topics, scientific quality of the submitted proposal and quality of the team. Finally, thank to international external expertise, it was possible to select 13 tutorials, among them, three tutorials of one day duration.

The topics selected are very broad and deal with popular topics as volume graphics, real-time interactive massive model visualization, and many other themes as inverse rendering, mobile 3D applications with open GL and M3G, inhabited simulated worlds, collision handling, etc. Participants of Eurographics 2006 will benefit of a great variety of tutorials topics and have the choice during two days to complete knowledge in one of these areas described.

We are grateful to everyone who has submitted a tutorial to Eurographics and also to all our reviewers for their useful comments and evaluation.

Nadia Magnenat-Thalmann and Katja Bühler
Tutorials Chairs, Eurographics 2006

### Table of Contents

#### T1 Geometric Modeling Based on Triangle Meshes (full day)  
Vol. 1/1

**Organizers:** Mario Botsch, Mark Pauly (ETH Zurich)  
**Speakers:** Mario Botsch, Mark Pauly (ETH Zurich)  
Stephan Bischoff, Leif Kobbelt (RWTH Aachen)

#### T2 Real time Interactive Massive Model Visualization (full day)  
Vol. 1/107

**Organizers:** Philipp Slusallek (Saarland University)  
**Speakers:** David Kasik (The Boeing Company)  
Dinesh Manocha (UNC Chapel Hill)  
Abe Stephens (University of Utah)  
Beat Bruderlin (TU Ilmenau)  
Philipp Slusallek (Saarland University)  
Enrico Gobbetti (CRS4, Sardinia)  
Wagner Correa (IBM)  
Inigo Quilez (VRcontext)

#### T3 Developing Mobile 3D Applications with Open GL ES and M3G (half day)  
Vol. 1/279

**Organizer:** Kari Pulli (Nokia Research Center & MIT CSAIL)  
**Speakers:** Kari Pulli (Nokia Research Center & MIT CSAIL)  
Jani Vaarala (Nokia)  
Ville Miettinen (Hybrid Graphics)  
Tomi Aarnio (Nokia Research Center)  
Mark Callow (HI Corporation)

T4  Efficient Sorting and Searching in Rendering Algorithms (half day)  
Organizer:  Vlastimil Havran (Czech Technical University)  
Speakers:  Vlastimil Havran (Czech Technical University)  
           Jiri Bittner (Vienna University of Technology)  

T5  Inverse Rendering: From Concept to Applications (half day)  
Organizer:  Celine Loscos (University College London)  
Speakers:  Celine Loscos, Katrien Jacobs (University College London)  
           Gustavo Patow, Xavier Pueyo (Universitat de Girona, Girona Graphics Group)  

T6  High Performance Virtual Garment Simulation (half day)  
Organizers:  Wolfgang Straßer (University of Tübingen)  
             Markus Wacker (HtW Dresden)  
Speakers:  Wolfgang Straßer, Bernhard Thomaszewski (University of Tübingen)  
           Nadia Magnenat-Thalmann, Pascal Volino (MIRALab, University of Geneva)  
           Markus Wacker (University of Tübingen & HtW Dresden)  

T7  Real-Time Volume Graphics (full day)  
Organizer:  Markus Hadwiger (VRVis Research Center, Vienna)  
Speakers:  Klaus Engel (Siemens Corporate Research)  
           Markus Hadwiger (VRVis Research Center, Vienna)  
           Joe M. Kniss (University of Utah)  
           Christoph Rezk-Salama (University of Siegen)  

T8  Real-Time Inhabited Virtual Worlds and Interaction (half day)  
Organizers:  Nadia Magnenat-Thalmann (University of Geneva)  
Speakers:  Nadia Magnenat-Thalmann, George Papagiannakis (MIRALab, University of Geneva)  
           Antonio Frisoli, Massimo Bergamasco (PERCR0)
T9 Populating Virtual Environments with Crowds (half day) Vol. 2/869

Organizers: Daniel Thalmann (EPFL VRlab)
Speakers: Daniel Thalmann, Pablo de Heras Ciechomski (EPFL VRlab)
Carol O'Sullivan, Simon Dobbyn (Trinity College, Dublin)

T9.1 State-of-the-Art: Real-Time Crowd Simulation ........................................ 872
T9.2 Computerized Models for Virtual Humans and Crowds ................................. 889
T9.3 Rendering Pipeline Optimizations .............................................................. 896
T9.4 Variety Creation and Editing ........................................................................ 908
T9.5 Interaction .................................................................................................... 913
T9.6 Level of Detail for Real-Time Crowds ............................................................ 919
T9.7 Real-Time Crowd Rendering with Pre-Generated Impostors ....................... 932
T9.8 Perceptual Evaluation of Virtual Human Models ......................................... 943
T9.9 Navigational Strategies ............................................................................... 958

T10 Parallel Coordinates in the 21st Century (half day) Vol. 2/965

Organizer & Speaker: Alfred Inselberg (School of Mathematical Sciences, Tel Aviv University)

T10.1 Introduction .................................................................................................. 971
T10.2 The Plane $\mathbb{R}^2$ with $||-coords$ ............................................................ 979
T10.3 Multidimensional Lines .............................................................................. 985
T10.4 Planes, p-flats & Hyperplanes ..................................................................... 995
T10.5 Curves ........................................................................................................ 1015
T10.6 Approximate Planes & Flats ....................................................................... 1027
T10.7 Surfaces in $\mathbb{R}^N$ ................................................................................... 1041

T11 Illustrative Visualization for Medicine and Science (half day) Vol. 2/1061

Organizers: David S. Ebert (Purdue University)
Mario Costa Sousa (University of Calgary)
Ivan Viola (Technical University of Vienna)
Speakers: Bill Andrews (Medical College of Georgia)
Mario Costa Sousa (University of Calgary)
Bruce Gooch (Northwestern University)
David Ebert (Purdue University)
Ivan Viola (Technical University of Vienna)
Christian Tietjen (University of Magdeburg)

T11.1 Introduction to Perceptual Principles in Medical Illustration ....................... 1067
Slides ................................................. 1072
T11.2 Overview of NPR for Computerized Illustration ......................................... 1091
Slides ................................................. 1092
Illustrative Visualization for Medical Training (reprint) .................................... 1109
T11.3 Perception and Evaluation: Optimizing Computer Imagery for Communication (slides) . 1117
T11.4 Volume Illustration for Medicine and Flows (slides) .................................... 1124
T11.5 Smart Visibility in Visualization and Focus of Attention ............................. 1138
Slides ................................................. 1139
Smart Visibility in Visualization (reprint) ......................................................... 1147
T12 GPUGI Global Illumination Effects on the GPU (half day) Vol. 2/1201

Organizer: László Szirmay-Kalos (TU Budapest)
Speakers: László Szirmay-Kalos, László Szecsi (TU Budapest)
Mateu Sbert (University of Girona)

T12.1 Global illumination rendering ................................................. 1203
T12.2 Local illumination rendering pipeline of current GPUs ...................... 1204
T12.3 Simple improvements of the local illumination lighting model ............. 1211
T12.4 Ray tracing on the GPU .......................................................... 1221
T12.5 Specular effects with rasterization .......................................... 1229
T12.6 Diffuse/glossy indirect illumination computation ............................ 1240
T12.7 Pre-computation aided global illumination ................................ 1250
T12.8 Fake global illumination ......................................................... 1268
T12.9 Conclusions ............................................................................ 1273
References ....................................................................................... 1274

T13 Collision Handling and its Applications (half day) Vol. 2/1279

Organizer: Matthias Teschner (Freiburg University)
Speakers: Matthias Teschner (Freiburg University)
Marie-Paule Cani (INP Grenoble)
Ron Fedkiw (Stanford University, USA)
Robert Bridson (University of British Columbia, Canada)
Stephane Redon (INRIA Rhone-Alpes, France)
Pascal Vologn (University of Geneva, Switzerland)
Gabriel Zachmann (Clausthal University, Germany)

T13.1 Hair interactions ..................................................................... 1283
T13.2 Collision Detection on Deformable Surfaces ................................. 1291
T13.3 Continuous Collision Detection and Handling for Rigid and Articulated Bodies ...................................................... 1302
T13.4 Collision Detection for Volumetric Deformable Objects (slides) ...... 1319
T13.5 Collision Response for Volumetric Deformable Objects (slides) ..... 1327
T13.6 Collision Detection on Point Clouds (slides) ................................. 1330
