

Intuitive Colormaps for Environmental Visualization

The materials for implementing the colormaps and techniques found in this paper can all be found at SciVisColor.org.

The ColorMoves section:

<http://sciviscolor.org/home/colormoves/>

provides instructions on **creating float files** and using the ColorMoves tool.

Example of a float file

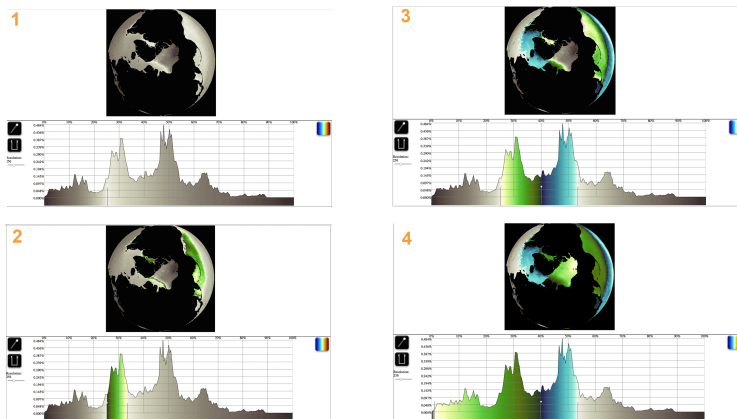

Colormaps in
CM:The Environment

At the bottom of the ColorMoves page is a link to

ColorMoves:The Environment: http://dsscale.org/colormap_viewer/Environment.html

The xml files for all of the colormaps can be found at:

http://sciviscolor.org/home/colormoves/colormovesenvironmental_xml_files/

An example of building a custom colormap in
ColorMoves: The Environment.
