Machine Learning Methods in Visualisation for Big Data

Norrköping, Sweden
May 25, 2020

Organising Committee
Daniel Archambault, Swansea University, United Kingdom
Ian Nabney, University of Bristol, United Kingdom
Jaakko Peltonen, Tampere University, Finland

Proceedings Production Editor
Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)
Sponsored by EUROGRAPHICS Association

Table of Contents

Table of Contents ................................................................. iii
International Programme Committee ........................................ iv
Author Index ............................................................................. v

Papers

Progressive Multidimensional Projections: A Process Model based on Vector Quantization ..................... 1
*Elio Alejandro Ventocilla, Rafael M. Martins, Fernando V. Paulovich, and Maria Riveiro*

ModelSpeX: Model Specification Using Explainable Artificial Intelligence Methods .............................. 7
*Udo Schlegel, Eren Cakmak, and Daniel A. Keim*

Visual Analysis of the Impact of Neural Network Hyper-Parameters ................................................. 13
*Daniel Jönsson, Gabriel Eilertsen, Hezi Shi, Jianmin Zheng, Anders Ynnerman, and Jonas Unger*

Improving the Sensitivity of Statistical Testing for Clusterability with Mirrored-Density Plots ............ 19
*Michael C. Thrun*

Visual Interpretation of DNN-based Acoustic Models using Deep Autoencoders ............................... 25
*Tamás Grósz and Mikko Kurimo*
International Programme Committee

Benjamin Bach (University of Edinburgh, UK)
Rita Borgo (King’s College London, UK)
Helwig Hauser (University of Bergen, Norway)
Nick Holliman (Newcastle University, UK)
John A. Lee (Université catholique de Louvain, Belgium)
David Lowe (Syndial)
Cagatay Turkay (University of Warwick, UK)
Michel Verleysen (Université catholique de Louvain, Belgium)
Yong Wang (HKUST)
