Index

Keynote Speech

Educational Trojan Horses

Michael J. Bailey

1 - Computer Graphics Curricula in Computer Science

Presentations

Bringing the Introductory Computer Graphics Course into the 21st Century
Rosalee Wolfe

1.1 - Curricula

Position Papers

An Introductory Course on Visualization
B. Sousa Santos

Restructuring Computer Graphics and Visualisation Curricula at IST

Adapting Computer Graphics Curricula to Changes in Graphics Technology
L. E. Hitchner and H. A. Sowizral

Computer Graphics in the Scope of Informatics Engineering education
M. Próspero dos Santos

A Course in Topology-based Geometric Modeling
P. Lienhardt, L. Fuchs and Y. Bertrand

Re-Inventing the Introductory Computer Graphics Course: Providing Tools for a Wider Audience
S. Cunningham

1.2 - Techniques and Tools

Position Papers

A Mathematica Package for CAGD and Computer Graphics
A. Iglesias, F. Gutiérrez and A. Gálvez

The Development of a Digital Library to Support the Teaching of Computer Graphics and Visualization
G. Scott Owen, Raj Sunderraman and Yanqing Zhang

GVE'99 – Coimbra - Portugal
Learning 3D Visualisation with MALUDA

J. A. Madeiras Pereira and M. R. Gomes

Teaching the Graphics Processing Pipeline: Cosmetic and Geometric Attribute Implications

J. Bresenham

Strengthening Visual Skills by Recognising Rendering Algorithms

R. Wolfe

MAVERIK: A Virtual Reality System for Research and Teaching

T. Howard, R. Hubbold and A. Murta

2 - Computer Graphics Curricula in the Arts

Presentations

Computer Graphics Curricula in the Visual Arts

D. E. Eber

An Interdisciplinary Approach to Teaching Computer Animation to Artists and Computer Scientists

D. S. Ebert and D. Bailey

Position Papers

Combining Art and Mathematics in Computer Graphics Education

M. Ollila

Computers in Art and Design Education - Past, Present and Future

T. Longson

3 - Online Education

Presentations

Online Education

Anne Mumford

3.1 - Architecture

Position Papers

On the Functionality of Distributed Multimedia-System Architecture for Educational Applications

D. Dochev, R. Pavlov and R. Yoshinov
3.2 – Collaboration

Position Papers

Three Collaborative Models for Computer Graphics Education 123
C. Case

Enabling Educational Collaboration - A New Shared Reality 131
J. R. Brown

3.3 - Teaching

Position Papers

Supporting Face to Face Teaching 135
A. Mumford

Web Based Multi-User Interactive Graphics Worlds for Education 137
G. Scott Owen

4 - Computer Graphics as a Tool for Teaching & Learning

Presentations

Using Web-Based Computer Graphics to Teach Surgery 141
K. Brodlie, N. El-Khalili and Ying Li

Position Papers

Visualisation in teaching-learning mathematics: the role of the computer 147
G. Chiappini and R. M. Bottino

Virtual Environment of Water Molecules for Learning and Teaching Science 153
J. F. Trindade, C. Fiolhais, V. Gil and J. C. Teixeira

Evaluation of Driving Education Methods in a Driving Simulator 159
J. M. Letiño, A. Moreira, J. A. Santos, A. A. Sousa and F. N. Ferreira

Scientific Visualization as a Tool for Power Engineering Education 165
P. Slavik and F. Hrdlicka

5 - Training for Real World Applications

Presentations

Future TDs Need to Know
J. F. Morie

GVE'99 – Coimbra - Portugal
6 - Human-Computer Interaction

Presentations

Human-Computer Interaction and Cognitive Psychology in Visualization Education
T. T. Hewett

Position Papers

The Human-Computer Interfaces Course at IST
M. R. Gomes, J. M. Brisson Lopes and M. J. Fonseca

7 - Media Education

Presentations

Media Education at the Bauhaus-University Weimar
C. A. Wüthrich

Position Papers

Defining Interactive Multimedia Education: Expanding the Boundaries
B. Mitchell

8 - Courseware

Presentations

Modularity: The Key to Courseware Re-use
J. C. Teixeira

Position Papers

Courseware Reuse or Courseware to Reuse?
J. C. Teixeira, C. Páris, J. Madeira and J. Brisson Lopes

Framework for Development of Course Material for Teaching Computer Graphics
V. V. Kamat

List of Participants
